

Environmental Intelligence.

Tracking industrial impacts, watershed health, and compliance through rigorous data analysis.

ENVIRONMENTAL CAPABILITIES

Compliance Monitoring

- Permit violation tracking
- Pollution sensor data aggregation
- Regulatory reporting dashboards

Impact Modeling

- Noise & air quality contours
- Watershed runoff analysis
- Cumulative impact assessments

Infrastructure Mapping

- Utility network visualization
- Renewable energy siting
- Flood risk zoning

Public Transparency

- Citizen science data portals
- Environmental alert systems
- Accessible public maps

TECHNICAL RIGOR

Data Integrity:

Reproducible, open-source methodology.
Defensible data for hearings.

Focus Areas:

Air Quality, Water Systems, Zoning,
Industrial Development.
